

# Crawlspace

# DEPOT<sup>®</sup> LLC

The CS75 removes up to 75 pints of water a day from the air, uses up to 40% less energy than a standalone dehumidifier, has no messy water buckets to empty and connects to Wi-Fi for easy control from your smart phone!

## MEGADRY<sup>®</sup>

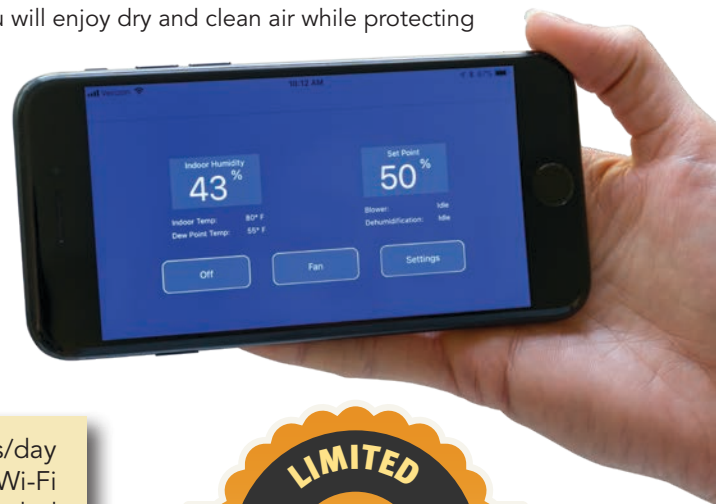

Wi-Fi CONNECTED DEHUMIDIFIER

The newest innovation in crawlspace dehumidification is the MEGA DRY CS75 Wi-Fi Connected Dehumidifier, a powerful system designed specifically to fit even the tightest spaces. The Mega Dry is also designed to operate in environments like a crawl space (see specifications). Now you can adjust the unit without having to enter the crawl space because the dehumidifier features a control with Wi-Fi capability. This amazing unit provides the dehumidification necessary to dry out even the wettest crawl spaces by removing up to 75 pints of water each day. In a closed crawl space application, it will control areas up to 3,000 sq. ft. The CS75 is also up to 40% more efficient than a stand-alone dehumidifier which saves you money right away. And it's easy to use!

With a variety of installation and control options including whole-house ducting, the CS75 operation can be as simple as setting the humidistat, and since this unit is permanently drained, there are no buckets to empty or other maintenance requirements. With the CS75 you will enjoy dry and clean air while protecting your health and property.

Hanger Kit available for ease of installation.

## Specifications

Capacity:	.....75 pints/day
Control	.....touch screen, Wi-Fi
Electrical:	.....110-120 VAC, 6.7 FLA Amps, 60 Hz, grounded
Operating Temp. Range:	.....50°F min, 90°F max
Air Flow:	.....180 CFM without external ducting
Refrigerant:	.....R-410A
Filter Size:	.....High Efficiency (MERV 11) Pleated 12" x 10" x 1"
Size (Clearance):	.....12.75" H x 12.6" W x 21" L
Weight:	.....58 pounds

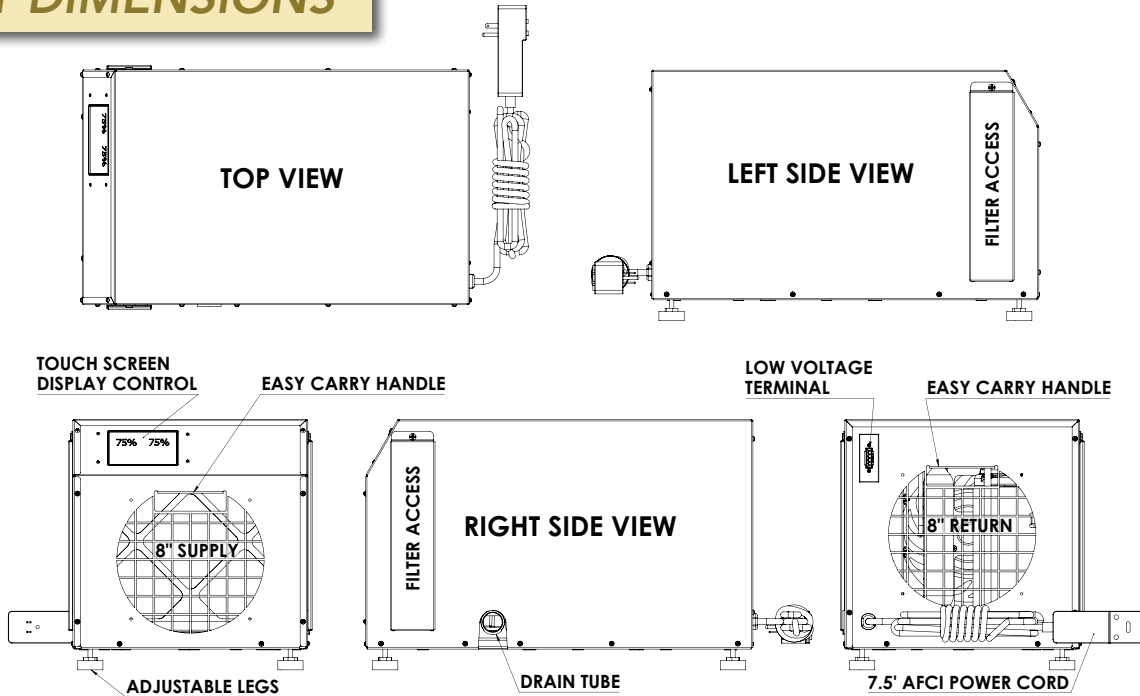

Tested to ANSI/UL 474, and to CAN/CSA Std. G22.2 No. 92-197.

Designed, engineered, and manufactured in Novi, Michigan USA

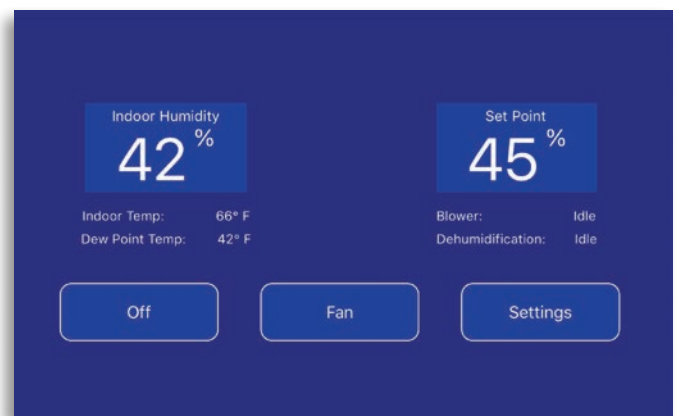

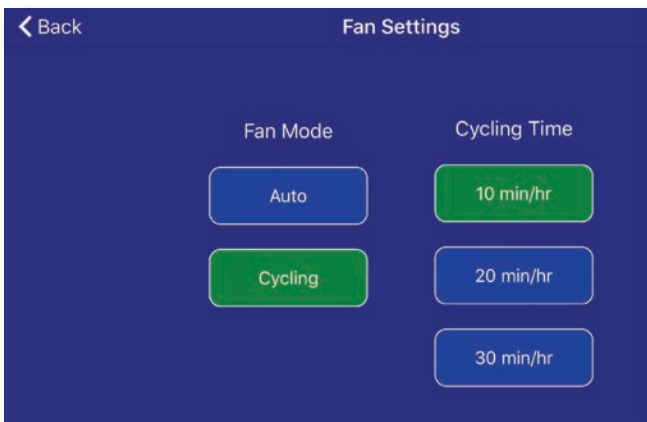

## UNIT DIMENSIONS

The CS75 comes equipped with the newest in safety standards: an AFCI Power Cord; first in class electrical safety for homeowners.

## WI-FI FEATURES

Control the features of your dehumidifier right from the app in your smartphone. As shown in these application screenshots, you can turn the unit on/off, adjust the humidity set point, view current conditions, cycle the fan and more.
